Thiyagaraja Abbishanth

Cybersecurity Product Support Intern

Badulla, Sri Lanka | +94 76 717 9898 | abbishanth1209@gmail.com

Abbishanth | abbishanth09

Professional Summary

Motivated Computer Science undergraduate with hands-on experience in software development, system deployment, and technical troubleshooting. Completed 42 hours of Cybersecurity & Ethical Hacking training covering Linux, Python, social engineering, Wi-Fi hacking, web/API/mobile pentesting, Active Directory, and IoT hacking. Participated in a Google.org-supported Cybersecurity Competition and completed Deloitte's Cyber Security & Forensic Technology job simulation. Experienced in Docker, AWS, REST APIs, Git, SQL, and Linux-based environments. Familiar with security awareness concepts, application support, and incident investigation. Eager to contribute to cybersecurity product rollouts, phishing simulations, security awareness campaigns, and technical support as an intern. A quick learner with strong problem-solving, presentation, and teamwork skills, committed to delivering reliable technical support and documentation.

Technical Skills

Languages: Java, JavaScript (ES6+), Python, PHP, SQL, C, C++, Golang
Backend Frameworks: Spring Boot, Node.js, Express.js, Django, Django REST Framework
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Mobile: React Native, Firebase
Architecture: REST API Design, Modular Monolith, MVC, Microservices
Authentication & Security: Keycloak (OAuth 2.0 / OpenID Connect), JWT, Role-Based Access Control (RBAC)
Cybersecurity: Wireshark, Burp Suite, Phishing Analysis, Penetration Testing, Social Engineering, Active Directory, IoT Security, Wi-Fi Security, OSINT
Databases: PostgreSQL, MySQL, MongoDB, Hibernate / JPA, Mongoose
DevOps & Cloud: Docker, Docker Compose, AWS S3, Git, GitHub
Tools: Postman, JasperReports, VS Code, Linux, Command Line

Projects

Aventra — Smart Clinic Management System | *Real Client Project* **2026 – Present**

- Built a modular monolithic healthcare platform with **Spring Boot 3**, **PostgreSQL**, and **MongoDB** for patient management, appointments, clinical services, lab tests, billing, and notifications.
- Implemented a billing system with invoice lifecycle, partial payments, daily revenue reporting, and CSV export.
- Integrated **AWS S3** for cloud storage and **JasperReports** for PDF generation of prescriptions and lab reports.
- Secured endpoints with **Keycloak OAuth2 + JWT** and RBAC across 5 roles; containerized the full stack with **Docker Compose**.
- Prepared technical documentation for API endpoints, system configurations, and deployment procedures.

Tech: Java, Spring Boot, PostgreSQL, MongoDB, Docker, Keycloak, AWS S3, JasperReports, React, Tailwind CSS

GarageGo — Vehicle Service Booking & Scheduling System **2025**

- Built a full-stack garage booking platform with **Django REST Framework**, **MySQL**, and **React**, featuring vehicle management, real-time slot availability, and role-based dashboards for customers, admins, and mechanics.
- Implemented double-booking prevention, booking lifecycle tracking, mechanic assignment workflow, and JWT authentication.

Tech: Django, Django REST Framework, MySQL, React, Bootstrap, JWT

Care Connect — Digital Healthcare Platform | *HACKMS – 2nd Runner-Up* **2026**

- Developed a healthcare management system using the **MERN stack** with JWT authentication, role-based access control, and patient-provider interaction features.
- Built dashboards for patients, doctors, and admins with appointment booking, health summaries, and staff management.

Tech: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

Back2Me — Lost & Found Mobile Application **2026**

- Built a cross-platform mobile app with **React Native** and **Firebase** for reporting, searching, and reclaiming lost items with real-time notifications and location-based matching.

- Implemented user authentication, image uploads, push notifications, and an admin moderation dashboard.

Tech: React Native, Firebase, Expo, JavaScript

Serendip Waves — Cruise Booking Platform **2025**

- Built a full-stack cruise booking platform with **PHP/MySQL** backend and **React** frontend, featuring real-time booking, inventory management, and OTP-based email verification.
- Developed modular PHP APIs with RESTful principles for cabin booking, meal preferences, and facility reservations.

Tech: React, PHP, MySQL, Tailwind CSS

Education

Uva Wellassa University **2023 – 2027 (Expected)**

BSc (Hons) in Computer Science and Technology *Badulla, Sri Lanka*

- Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Management, Operating Systems, Computer Networks, Object-Oriented Programming.

Cambridge College **Feb 2022**

GCE Advanced Level — Maths Stream *Kotakala, Sri Lanka*

St Marys National College **Dec 2017**

GCE Ordinary Level *Bogawantalawa, Sri Lanka*

Certifications & Achievements

Cybersecurity & Ethical Hacking — CappricioSec University, Nov 2025. (42 hrs: Linux, Python, Social Engineering, Wi-Fi Hacking, Web/API/Mobile Pentesting, Active Directory, IoT Hacking)
Cybersecurity Competition 2025 — APAC Cybersecurity Fund / Cyber Security Hub, UWU. (Supported by Google.org)
Deloitte Technology Job Simulation — Forage, 2024. (Coding, Data Analysis, Development, Cyber Security, Forensic Technology)
Introduction to Cloud Skills with AWS — QrioMatrix Technologies / Qcerty, 2026.
AI & Machine Learning Research Fundamentals — QrioMatrix Technologies / Qcerty, 2026.
Azure AI Speech Translation & Serverless APIs Workshop — Microsoft Student Ambassadors, MS Club of UWU, 2024.
Python for Beginners — University of Moratuwa, 2025.
HackMS 2026 Hackathon — 2nd Runner-Up, MS Club of Uva Wellassa University.
UVAXTREME 1.0 — Participation, 2024.

Languages

Tamil — Native | **English** — Professional Proficiency | **Sinhala** — Elementary Proficiency
