Thiyagaraja Abbishanth

Intern Software Engineer

Bogawantalawa, Sri Lanka | +94 76 717 9898 | abbishanth1209@gmail.com

Abbishanth | abbishanth09

Professional Summary

Computer Science undergraduate and full-stack developer with hands-on experience building scalable web and mobile applications using Java, Spring Boot, Django, PHP, React Native, and the MERN stack. Proficient in designing RESTful APIs, implementing OAuth2/JWT authentication, and containerizing applications with Docker. Currently delivering a production healthcare platform on a Spring Boot modular monolith with PostgreSQL, MongoDB, and Keycloak. Passionate about cybersecurity with hands-on exposure through the APAC Cybersecurity Competition and Deloitte's Technology Job Simulation in cyber security and forensic technology. Seeking a Software Developer Intern role to apply and expand full-stack development and security-focused engineering skills in a professional environment.

Technical Skills

Languages: Java, JavaScript (ES6+), Python, PHP, SQL, C, C++, Golang
Backend Frameworks: Spring Boot, Node.js, Express.js, Django, Django REST Framework
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Mobile: React Native, Expo, Firebase
Architecture: REST API Design, Modular Monolith, MVC, Microservices, Agile / Scrum
Authentication & Security: Keycloak (OAuth 2.0 / OpenID Connect), JWT, Role-Based Access Control (RBAC)
Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore, Hibernate / JPA, Mongoose
DevOps & Cloud: Docker, Docker Compose, AWS S3, Git, GitHub
Tools: Postman, JasperReports, VS Code, Linux, Command Line

Projects

Aventra — Smart Clinic Management System | *Real Client Project* **2026 – Present**

- Developing a real-world healthcare management platform for a client following **Agile (Scrum)** methodology, using a modular monolithic architecture in Spring Boot, with modules for patient management, appointments, clinical services, lab management, billing, and notifications.
- Developed RESTful APIs using **Spring Boot 3** and **Spring Data JPA (Hibernate)** with **PostgreSQL** and **MongoDB** for relational and document data persistence.
- Built a complete billing system with invoice lifecycle management, partial payments, daily revenue reporting, and CSV export.
- Secured all endpoints with **Keycloak OAuth2 + JWT** authentication and role-based access control across 5 roles.
- Containerized the entire stack using **Docker Compose** and integrated **AWS S3** for cloud storage of PDF reports generated with JasperReports.

Tech: Java, Spring Boot, PostgreSQL, MongoDB, Docker, Keycloak, AWS S3, JasperReports, React, Tailwind CSS

GarageGo — Vehicle Service Booking & Scheduling System **2025**

- Built a full-stack garage service booking platform with a **Django / MySQL** backend and React frontend, featuring real-time slot availability with double-booking prevention and role-based dashboards.
- Developed RESTful APIs using **Django 5.0** and **Django REST Framework** for vehicle, service, and booking modules with **MySQL 8.0**.
- Built booking lifecycle management with status tracking (Pending → Approved → In Progress → Completed), mechanic assignment, and payment updates.
- Secured all endpoints with **JWT authentication** and role-based access control (3 roles: Customer, Admin, Mechanic).

Tech: Django, Django REST Framework, MySQL, React, Bootstrap, JWT

Care Connect — Digital Healthcare Platform | *HACKMS Competition* **2026**

- Developed a comprehensive healthcare management system using the MERN stack, enabling secure patient-provider interactions and streamlined clinic operations.
- Implemented **JWT-based authentication** and role-based access control with patient dashboards and admin portal for scheduling and monitoring.

- Integrated **MongoDB with Mongoose** for structured data storage and applied RESTful API principles with modular Express.js routes.
- Frontend built with **React + Vite**, styled with Tailwind CSS, enhanced with React Router and Context API.

Tech: React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

Back2Me — Lost and Found Mobile App **2025**

- Developing a cross-platform mobile application using **React Native (Expo)** to help users report and recover lost items through a centralized platform with real-time data synchronization.
- Integrated **Firebase Authentication** for secure login and **Firebase Firestore** for cloud-based storage with instant updates.
- Implemented real-time location-based notifications to alert nearby users about newly reported items, enhancing recovery speed.
- Designed core modules including search with tab navigation, photo upload, item reporting, user profile with statistics, and alerts page.

Tech: React Native, Expo, Firebase Authentication, Firebase Firestore, JavaScript

Serendip Waves — Cruise Booking Platform **2025**

- Built a full-stack cruise booking platform with **PHP/MySQL** backend and React frontend, featuring real-time booking, inventory management, and OTP-based user verification.
- Integration of **MySQL database** for structured data storage and utilized modular PHP scripts with RESTful principles.
- Frontend built with **React + Vite**, featuring ESLint integration and component-based architecture for future expansion.

Tech: React, PHP, MySQL, Tailwind CSS

Education

Uva Wellassa University **2023 – 2027 (Expected)**

BSc (Hons) in Computer Science and Technology *Badulla, Sri Lanka*

- Relevant Coursework: Software Engineering, Data Structures & Algorithms, Database Management, Operating Systems, Computer Networks, Object-Oriented Programming, Software Design Patterns.

Cambridge College **Feb 2022**

GCE Advanced Level — Maths Stream *Kotakala, Sri Lanka*

St Marys National College **Dec 2017**

GCE Ordinary Level *Bogawantalawa, Sri Lanka*

Certifications & Achievements

Deloitte Technology Job Simulation — Forage, 2024. (Coding, Data Analysis, Development, Cyber Security, Forensic Technology)
Introduction to Cloud Skills with AWS — QrioMatrix Technologies / Qcerty, 2026.
AI & Machine Learning Research Fundamentals — QrioMatrix Technologies / Qcerty, 2026.
Azure AI Speech Translation & Serverless APIs Workshop — Microsoft Student Ambassadors, MS Club of UWU, 2024.
Python for Beginners — University of Moratuwa, 2025.
HackMS 2026 Hackathon — 2nd Runner-Up, MS Club of Uva Wellassa University.
Cybersecurity Competition 2025 — APAC Cybersecurity Fund / Cyber Security Hub, UWU. (Supported by Google.org)
UVAXTREME 1.0 — Participation, 2024.

Languages

Tamil — Native | **English** — Professional Proficiency | **Sinhala** — Elementary Proficiency
